

Martin Manish Kochappilly

SOC Analyst | Cybersecurity Analyst

Thane, Maharashtra

+91 9819030769 | martinkochappilly2005@gmail.com | LinkedIn-<http://www.linkedin.com/in/martin-kochappilly>

Professional Summary

Dedicated and detail-oriented aspiring SOC Analyst with a strong foundation in cybersecurity, networking, Linux, and ethical hacking. Certified in Certified Ethical Hacker (CEH) and Kali Linux, with hands-on experience using Kali Linux, TryHackMe, Nmap, Wireshark, BurpSuite, Metasploit, and Nessus. Skilled in vulnerability assessment, security monitoring, network traffic analysis, incident response fundamentals, and threat detection, with a strong commitment to continuous learning and cybersecurity best practices.

Technical Skills

- **Operating Systems:** Kali Linux, Windows
- **Networking:** TCP/IP, DNS, DHCP, HTTP/HTTPS, LANs, WANs, Common Ports & Protocols
- **Security Tools:** Nmap, Wireshark, Burp Suite, Metasploit, Nessus
- **Security Concepts:** Vulnerability Assessment, Threat Detection, Incident Response, Log Analysis, Security Monitoring, OWASP Top 10, Authentication & Encryption Fundamentals
- **SOC & SIEM Fundamentals:** Splunk, Microsoft Sentinel, Security Event Analysis, Alert Triage, Incident Handling Fundamentals, Threat Intelligence Fundamentals
- **Network Security:** VPN, Firewalls, IDS/IPS Fundamentals
- **Scripting:** PowerShell, Python (Fundamentals)
- **Learning Platforms:** TryHackMe

Education

Bachelor of Science in Information Technology (B.Sc. IT) - CGPA: 7.83/10.00

2026

Smt. Chandibai Himathmal Mansukhani College (University of Mumbai)

Certifications

- [Certified Ethical Hacker \(CEH\) Certification](#) – Nettech India
- [Kali Linux Certification](#) – Nettech India

Hands-on Cybersecurity Experience- Tryhackme & Independent Virtual Labs

May 2026 - Present

- Conducted network reconnaissance and vulnerability assessments utilizing Nmap and Nessus to identify and evaluate security vulnerabilities within simulated environments.
- Analyzed network traffic and packet-level data using Wireshark to investigate anomalous behavior and support threat analysis.
- Performed web application security assessments using Burp Suite, focusing on vulnerability discovery and security validation.
- Applied Linux administration, enumeration, privilege escalation, and security monitoring techniques through hands-on TryHackMe labs.
- Investigated simulated cybersecurity scenarios involving vulnerability assessment, alert analysis, incident response fundamentals, and threat detection within controlled laboratory environments.
