PROFILE

Software Engineer with hands-on experience in full-stack web development and AI-driven solutions, skilled in building scalable and user-focused applications using JavaScript, TypeScript, React.js, Next.js, Node.js, and Express.js. Experienced in developing REST APIs, database-driven applications, and performance-optimized web solutions. Also experienced in Generative AI, prompt engineering, AI automation, and AI agent development, with a strong interest in applying emerging technologies to solve real-world problems. Passionate about learning new technologies, building production-ready applications, and improving development workflows through automation.

EXPERIENCE

Junior Cinematic Artist

March 2026 - July 2026

Mythik Entertainment, Mumbai

- Created high-quality visual content using various generative AI models for image and video generation.
- Designed and developed custom GPTs to automate and optimize prompt generation for image and video creation workflows.
- Conducted research and development on AI agents for automating image-generation tasks, improving workflow efficiency and reducing manual effort.
- Experimented with emerging generative AI tools, models, and techniques to improve visual quality, consistency, and content production workflows.
- Developed AI-assisted creative workflows by combining prompt engineering, generative AI, and automation to streamline content production.

Full Stack Developer Intern

June 2025 - October 2025

Perfectlyokay, Mumbai (On-site)

- Frontend Development: Built responsive product interfaces using Next.js and TypeScript, creating reusable custom components for enhanced user experience
- SEO & Performance: Implemented SEO optimization strategies and sitemap generation to improve search visibility and site performance
- Backend Systems: Developed web scrapers and worked extensively with MongoDB aggregations for data processing and analysis
- Web Technologies: Configured session management, cookie handling, and caching mechanisms for improved application performance
- AI Integration: Successfully integrated AI models into existing systems, demonstrating adaptability to emerging technologies
- Quality Assurance: Identified and resolved critical bugs, ensuring stable production deployments

SKILLS

Languages: JavaScript, TypeScript, Python

Frontend: React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, FastAPI

Databases: MongoDB, MySQL, PostgreSQL

Agentic AI: LangChain, LangGraph, RAG, AI Agents

Tools: Git, Docker, Qdrant, LangSmith, Figma, Canva

EDUCATION

Smt. Chandibai Himathmal Mansukhani College

2023 - 2026

Bachelor of Information Technology

PROJECTS

My Portfolio Website: <https://portfolio-one-lac-74.vercel.app>

E-Commerce Website:

This is a fully functional E-commerce Website built with the MERN stack (MongoDB, Express.js, React.js, Node.js). The platform features a robust backend to handle user authentication, product management, and order processing, along with a responsive and intuitive front-end user interface.

Key Features:

- User Management: Secure user registration and login
- Admin Panel: Dedicated dashboard for managing products and tracking orders.
- Product Management: Add, edit, or remove products easily
- Order Handling: Track order status and manage shipping details
- Fully Responsive: Optimized for all devices (desktop, tablet, mobile)
- Secure Backend: Built with Express and MongoDB to ensure performance and data integrity

This project demonstrates a complete full-stack e-commerce solution with scalability and real-world functionality.
